

ZANOMOLED AWARD WINNING LED DIMMER

TECHNICAL OVERVIEW

The ZANOMOLED has been specifically designed to dim LED lamps. The advanced technology used to control the load results in flicker-free dimming of lamps and drivers. This technology also eliminates the need to differentiate between leading and trailing edge lamps. It works with either! All our LED dimmers have built-in thermal and over-load protection, minimum and start level settings and boost feature. It is essential before making connections to check the load against the table to ensure it meets the specification of the dimmer switch. The ZGRIDLED is the first dimmer designed with built-in start and minimum level.

SPECIFICATIONS

PART NO.	ZANOMOLED250
MODULE SIZE	SINGLE GRID
LAMP TYPE	LED /CFL
